EDUCATION

Washington State University

Bachelor of Science in Computer Science - **GPA: 3.63**

Pullman, WA

August 2021 – May 2025

EXPERIENCE

Software Engineer

June 2025 – Present

Jeroyaf Accounting & Tax Services

Remote

- Automated processing of 100+ bank statements using **Python regex and pandas**, achieving 100% transaction accuracy through **dynamic classification** and unit testing
- Developed a **scalable** PDF-to-Excel financial pipeline that reduced manual data entry by 70% and improved accounting workflow efficiency by 50%.
- Implemented a Python **Unittest** suite with 90% **test coverage**, reducing system bugs by 60% and improving system uptime by 10%.
- Integrated **GitHub Actions CI/CD** pipelines to eliminate manual deployments and cut processing time by 30% across five accounting scenarios.

Software Engineer in Test

Sep. 2023 – Dec. 2024

Schweitzer Engineering Laboratories inc.

Pullman, WA

- Modernized 5+ legacy test scripts into modern automation modules, cutting code maintenance time by 30% and boosting code reusability by 50%.
- Automated **embedded system** validation using **C#** and Python test scripts, increasing **regression coverage** by 40% and accelerating release cycle time by 5%.
- Engineered **PowerBI** dashboards with Python and internal **APIs** to redesign Station Support Request (SSR) workflows, improving data accessibility and reducing troubleshooting time by 20%.
- Resolved 10+ critical product test failures through **root cause analysis**, shortening release cycles by 25% and enhancing **feedback loops** by 40%.

RELEVANT PROJECTS

Spreadsheet Engine - Object Oriented Desktop Application | C#, .Net, WinForms, OOP Principles

- Built a **spreadsheet application** from scratch using **OOP principles**, enabling 10k+ cell operations with 99% accuracy and 40% faster calculations through **expression trees** and undo/redo systems.

Tree Inspect | Typescript, React, Vite, Zustand

- Developed an interactive tree visualization platform for **learning tree-based data structures**, featuring real-time traversal animations and efficient **state management** for responsive UI performance.

IMDb Movie Sentiment Analysis | Python, TensorFlow, Keras, NLTK, Pandas

- Implemented an **LSTM** sentiment classifier achieving 84% accuracy on 50,000+ IMDB reviews, boosting training efficiency by 30% and **reducing overfitting** by 40% via optimized **preprocessing** and **architecture tuning**.

LEADERSHIP

Director of National Communications

Sep. 2022 – May. 2025

National Society of Black Engineers at WSU

Pullman, WA

- Revived chapter presence at national conference after **4-years**, led outreach to 20+ corporate partners, secured **\$3,000** in sponsorships, and increased engagement/support for underrepresented students by 40%.

TECHNICAL SKILLS

Languages: C/C++/C#, Python, SQL (MySQL, Postgre), JavaScript, HTML/CSS

Frameworks/Libraries: React, Node.js, Flask, NUnit, .Net, Cypress, Unittest, Pandas, Jest, TensorFlow, Matplotlib

Developer Tools: AWS, Azure, Docker, Git, Jira, Postman, PowerBI, PowerQuery
